

Insect

Imposters

(They are other invertebrates)

Pill
Bugs

Pill Bugs or Rolly Pollies are not insects! They are actually crustaceans, a type of invertebrate.

Spiders

Spiders are not Insects either! They belong to a order called arachnids. There are over 30,000 species of spiders in the world.

Fish

Imposters

(They are other invertebrates)

Starfish

Starfish belong to the phylum, Echinoderm. They are not fish, even though 'fish' is in their name!

Jellyfish

Jellyfish are not fish either! They belong to a phylum, Cnidaria.
